

MATTE FEATURES

Anti fingerprint

This is the best feature that marks and makes union this surface.
Completely free of touch marks.

Velvet Touch

The extremely matt surfaces is characterized by the unmistakable effect you can touch.

Scratch resistance

This is one of the most important properties of surfaces. The surfaces must be resistant to the stresses of use and cleaning, made to last during the time. With the highest degree of wear resistance (UNI EN 15186:2012 DIN 68861:2013 part.4), Prem Line Surfaces are protected by a special nano-technological treatment that makes them the leading product for architecture.

High resistance to chemicals.

The Surfaces provides a very high resistance of chemicals and solvents.

Uv resistance

Beauty and reliability are values that we consider strategic especially for our Partners. Prem Line Surfaces have no colour changes over the time neither contain any volatile substances which may cause unforeseen after their installation.

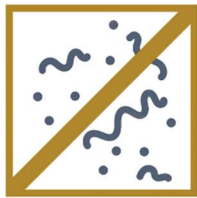

Easy cleaning

Stain-resistant, solvents and water proof, all surfaces are designed to be easy to maintain. You can use the most common cleaning detergents and also solvents such as acetone. The special nano-technological surface treatment vitrifies PET and thanks to the very closed-pore layer it does not hold dirt, dust and prevents the mites.

PVC Free-environmental friendly

Prem Line produces Surfaces with unique features without forgetting the environment. All Prem Line products also comply with the most restrictive regulations, do not give out dioxin and are PVC-free.

Antibacterial

Antibacterial surfaces thanks to a technology microbiologically tested and certified by the international standard **ISO 22196:2011**. The bacterial load is reduced up to 99.9% in 24 hours.
